

The Access 1500 control panel is an autostart control system used to provide remote starting capabilities exclusively for FG Wilson generating sets. The panel delivers a high value package while setting the standard in reliability, serviceability and package integration.

Access 1500

Standard specification

- ▶ Microprocessor controlled
- ▶ Engine parameter monitoring
- ▶ Autostart
- ▶ Sheet steel cabinet
- ▶ Hours run metre
- ▶ Overspeed protection
- ▶ UV stabilised IP55 fascia, impervious to diesel fuel or lubricating oil
- ▶ Wide operating temperature (-25 deg to +70 deg C)

Standard features

- ▶ **Controls**
 - Ready/off/key switch
 - Cold weather start (automatic)
 - Start push button
- ▶ **Shutdowns**
 - Low oil pressure
 - High water temperature
 - Overspeed/emergency stop
 - Fail to start/lockout
- ▶ **Alarms**
 - Charging alternator failure
 - Glow plugs energised
- ▶ **Status indicators**
 - Hours run metre
- ▶ **Circuit Breakers**
 - 3 Pole MCB

Standards

- ▶ 89/336/EEC EMC directive:
 - amended by 91/368/EEC, 93/44/EEC, 93/68/EEC
 - BS EN 61000-6-2 Emissions standard
 - BS EN 61000-6-3 Immunity standard
- ▶ 73/23/EEC Low voltage directive:
 - amended by 93/68/EEC
 - BS EN 60439-1
 - BS EN 50178

Control panel

FG Wilson has manufacturing facilities in the following locations:

Northern Ireland • Brazil • China • India • USA

With headquarters in Northern Ireland, FG Wilson operates through a Global Dealer Network. To contact your local Sales Office please visit the FG Wilson website at www.FGWilson.com
