

BE 72

Engine protection module

State-of-the-art engine protection module

The Be72 provides Manual start for engine-driven applications. Automatic fault protections include: Low oil pressure, High Temperature, Emergency and Belt break. The Be72 provides the following outputs: Start, Stop, Preheat, Alarm and Fuel solenoid. To use the Be72 in manual mode, a 50A rated key switch is provided to energize the starter. All functions are indicated by means of 8 LED lamps. Electrical connection is via a 1/4 inch blade terminal.

Key features:

- 50A dc Key-switch for Manual start
- Short circuit proof solid state outputs
- Compact 72x72x50 mm size, shock-proof
- Operating temperature -30/+70° C
- Full 3-year warranty, cost effective
- Operating voltage range 5,5 to 36Vdc
